PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience, specializing in React, TypeScript, and scalable frontend architecture. Honours engineering graduate of the University of Waterloo, bringing a formal engineering approach to problem decomposition and technical decision-making.

SKILLS

Languages: TypeScript, JavaScript, Python, Go

Frontend: React, Redux, MUI, Styled Components, HTML5, CSS3

Backend: Django, Node.js, REST APIs, PostgreSQL, SQL

Devops & CI/CD: Kubernetes, GCP, Docker, CircleCI

Testing: Jest, Cypress, Selenium

Tools: Git, Figma, Postman

Practices: Agile, Web Accessibility, Web Performance Optimization

WORK EXPERIENCE

Software Engineer (Skillpack/Platform Team) | Wrk Technologies | Remote | July 2021 – September 2023

- Led a full redesign of the Skillpack dashboard and core platform in React and TypeScript, delivering a modular component library of 20–30 components that reduced time-to-build for new frontend features by ~50%.
- Owned platform-wide frontend performance optimization through code splitting, lazy loading, and state management improvements, reducing page load times by 2–5 seconds across the platform.
- Co-developed a suite of 12–15 RESTful API endpoints in Django to replace legacy template-based data delivery, enabling the React frontend migration and decoupling frontend and backend concerns.
- Reduced a critical function's compute time by ~70% by redesigning the data pipeline in Luigi to pre-calculate results into a dedicated SQL table, eliminating redundant runtime computation.
- Cut a data pipeline's runtime from several days to hours by implementing a checkpointing system that skipped already-completed computations, enabling iterative reruns without full reprocessing.
- Authored a technical design document that resolved a critical misalignment between product and engineering, providing leadership with the clarity needed to make an informed executive decision on a blocked project.

EDUCATION

Chemical Engineering, Honours B.A.Sc. | 2022 | University of Waterloo
